

GARDEN BLEND PREMIUM

Technical Data Sheet

Hermanns Garden Blend Premium is a high-performance, weed-free growing medium engineered to deliver exceptional results in a wide range of landscape and garden applications. Made from a carefully balanced blend of organic materials, this lightweight, sustainable soil provides the ideal environment for healthy root development, vigorous plant growth, and long-term soil performance.

Formulated with optimum pH, excellent moisture retention, and superior porosity, Garden Blend Premium helps plants thrive by promoting consistent growing conditions. Because it is manufactured to strict specifications, every load delivers the same dependable quality and performance-eliminating the variability often found in naturally sourced soils.

Ideal For:

- Vegetable gardens
- Tree and shrub planting
- New garden bed construction
- Improving existing landscape beds
- General residential and commercial landscape projects

Key Benefits:

- Weed-free and ready to use
- High organic matter content
- Lightweight and easy to work with
- Excellent water-holding capacity
- Consistent quality from load to load

TYPICAL ANALYSIS:

pH	6.8 - 7.8
CEC (MEQ/100g)	> 25
Phosphorous (ppm)	30 - 100
Potassium (ppm)	80 - 500
Calcium (ppm)	< 5000
Magnesium (ppm)	100 - 500
Total Salts (mmhos/cm)	< 1.5
Organic Matter Minimum	30%
Air Space %	< 30
Total Porosity %	< 50
Water Holding Capacity % As	< 45
Is Density (kg/m ³)	700 - 950

Recommendations:

It is highly recommended, as with any soil, that plants are watered regularly to ensure optimum moisture content.
